SWIFT **NEW** PRODUCT

SPOTLIGHT

Swift ELECTRICAL SUPPLY COMPANY

nVent ERICO Cadweld Plus

Impulse Exothermic Welding Control Unit

Our latest innovation, the nVent ERICO Cadweld Plus Impulse Exothermic Welding Control Unit, brings you the highest level of flexibility and ease of use of any of our ignition systems. Precision engineered, the control unit lets you choose your power source: from off-the-shelf AA-batteries to the rechargeable Lithium-Ion packs you have on your job site.

nVent

SAFETY

- Self-closing trigger guard prevents accidental ignition, providing added safety
- Five second delay in ignition is a safety feature to allow the user to stop ignition, if necessary
- LED ignition counter provides instant feedback on ignition timing and is visible in sunny outdoor conditions

nVent ERICO Cadweld One Shot Cable To Ground Rod

- ***Single use ceramic mold*** which eliminates the need for a graphite mold and handle clamp/frame
- Produces a permanent connection that will not loosen or corrode
- Fits plain copper-bonded, threaded copper-bonded, full-size galvanized and stainless steel ground rods
- NEC® compliant

nVent ERICO Cadweld Plus Welding Material

nVent ERICO Cadweld Plus Welding Material consists of copper oxide and aluminum granular particles. Plus simplifies the method of making exothermic connections by packaging weld metal into an integrated cup, eliminating the need for starting material or a separate metal disk.

WE STOCK CADWELD

WORKS WITH THE ELECTRONIC IGNITOR!

- Color coding by size for easy identification
- No starting material required
- Non-explosive
- Not subject to spontaneous ignition

TETERBORO	100 Hollister Rd #5, Teterboro, NJ 07608	(201) 462-0900
