The Industry's Most **Intelligent** Residential Circuit Breaker System

The Leviton Load Center

With a focus on improved safety, revolutionary design and ease of installation, Leviton takes the load center into the 21st century. **THE FUTURE MADE CURRENT.**

LEVITON®
THE FUTURE IS ON®

Copper bus is a standard feature on all load centers.

No more pigtails.

IN STOCK!

Notches stamped into the enclosure for cable ties promote secure and neat wiring.

All hot and neutral wires terminate at custom lugs in the panel. This makes wiring quicker, easier and neater—and gives electricians more space to work. All final connections are made when the circuit breaker is plugged on.²

Circuit breakers provide more precise trips based on current, especially in extreme temperatures.¹

Rocker-style switches require less activation force.

Intuitive LEDs communicate trip condition and type of fault (AF/GF), and remain illuminated even when tripped.

Leviton GFCI, AFCI and Dual Function circuit breakers feature our patented reset lockout and will not reset if Ground or Arc Fault protection is compromised.

Color indicators in the handles designate operational status at-a-glance.

White circuit breakers are clean and sleek.
