PEDESTAL POSTS NEMA 3R LISTED RACEWAYS

Power Pedestal allow conduit to be routed below the roof-line, which further reduces the number of roof penetrations needed. Minimal penetrations help to maintain rooftop integrity, and improve the overall roof aesthetic. This solution frees installers from moving heavy loads of material to the roof.

Power Pedestal can be installed discretely while other trades are working in the same area. Since most raceway is out of the sunlight, de-rating of conductors per NEC 310.15 is greatly reduced.

Serve power to 99% of all common rooftop equipment

- NEMA 3R Listed raceway
- Stand-alone design, no extra bracing required
- Only ONE roof penetration per post – minimizes potential impact of rooftop integrity
- Route all conduit below roof line – improved structural integrity and roof appearance
- Saves Time – Ideal for off-site prefabrication
